The History Of Virtual Reality

In 1968, Ivan Sutherland introduced the world to what is commonly considered the first head-mounted augmented reality display, known as "The Sword of Damocles." This groundbreaking invention laid the foundation for the virtual reality devices we use today.

Like Never Before

There are plenty of definitions of VR today, which all more or less overlap in key areas. When we use the word "VR" now, it specifically refers to computer generated imagery and hardware specifically designed to bring those sights and sounds to us in a way that is totally immersive.
